iCreditSpace

Flutter Developer

Implementing user authentication and security measures to protect user data. Integrating different Api's like forget password, authentication, profile upload, document upload and others. Worked with functionalities like working with multiple Api's at a time, report download feature, searching documents in list from Api. Worked with MVVM model. Worked with Getx State management and bloc

Sep 2022 - May 2023

Across The Globe (ATG)

Developer Intern

As a Flutter developer, I have experience working with Firebase to build mobile applications with real-time database, cloud storage, and authentication. I have also integrated push notifications in my previous social media app projects using Firebase Cloud Messaging (FCM) and worked with Firebase Cloud Functions to handle server-side tasks. Regarding shopping apps, I have experience working with APIs to fetch product information. I have also implemented features such as search product listing, and cart management. requests. Collaborate with other developers to update the website and create new features
